

Anything goes in Almere

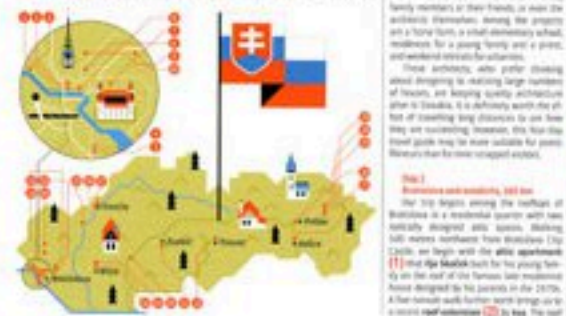

# Architecture on a diet

Where is the cutting-edge of contemporary architecture in Slovakia today? To find out, it is necessary to shift our focus from primary to secondary locations, from the big to the small scale, and to travel across the country, from west to east, starting in the capital Bratislava and finishing in the city of Košice.

**W**here is the cutting-edge of contemporary architecture in Slovakia today? To find out, it is necessary to shift our focus from primary to secondary locations, from the big to the small scale, and to travel across the country, from west to east, starting in the capital Bratislava and finishing in the city of Košice.

It is not the fact that they are not recognized by the media that makes them interesting. They are able to design with a laid-back attitude, as opposed to the edge, the sharp, the futuristic, the innovative design for highly visible public projects. The reaction of the young architects is not always what they seem to be. They are not always as they seem to be. They are not always as they seem to be. They are not always as they seem to be.

Since they are not exposed to media attention, these Slovak architects are able to design with a laid-back attitude.

Since they are not exposed to media attention, these Slovak architects are able to design with a laid-back attitude.
